What is DELTA's data center infrastructure & UPS solutions?

Delta's Data Center Infrastructure and UPS Solutions provide everything necessary to build a modern data center. Each component, from cooling to power distribution systems, is built using our innovative technology and design.

How much power does a data center need?

Our range spans from 1kVA to a substantial 1500 kVA, allowing for dynamic adjustments based on your immediate requirements. Such flexibility ensures your business can effortlessly accommodate increasing power demands both now, and in the years to come. Data centers serve as the nerve center of modern enterprises.

Why do data centers need a data center UPS system?

For data centers to ensure a continuous data supply to users, they must also maintain an uninterruptible power source at their core. Data center UPS systems are a form of power protection.

Why should you choose custom server racks & network cabinets?

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and reliability of your critical infrastructure. Let's discover the data center custom containment solutions that help you reach your objectives.

Explore high-performance server racks, data center cabinets, and power distribution solutions from CPI. Optimize space, cooling and uptime today.

Receive updates on the most important topics in the industry, with latest discussions and expert insights on AI, liquid cooling, and high performance computing in the data center.

Our trained experts will design the rack, mount your gear, wire your rack, verify high-availability configuration, and power up your equipment. Upon deployment, complete documentation and digital ...

Server Technology produces the highest quality Data Center rackmount power distribution units (PDUs) and monitoring solutions.

Read all instructions and warnings thoroughly before attempting to move, install or use the SmartRack Modular Data Center equipment as described in this manual.
