A robust 20kW off-grid solar system for farms, workshops, or large homes. Battery backup and high efficiency. Get a free quote today!

Autonomy: With this configuration, the system can operate off-grid for an extended duration without relying on external power sources, making it suitable for remote areas or emergency situations.

This should provide ample storage for complete system autonomy in case of an extended power outage of 3 to 5 days. Combine the battery storage with a PV solar panel system to ensure that you will have ...

It's compatible with both off-grid and grid-connected applications, meeting the needs of industrial auxiliary power supply, remote residential electricity needs, and emergency backup power.

Everything you need except for solar panels in one convenient package. All you need to do is connect solar panels to the unit.
