Provides high quality, flexible power distribution for high-density data centers. It is engineered to combine the convenience and cost savings of a pre-packaged, factory-tested unit with the flexibility ...

The space-saving PDU is easy to move and adapt to the future demands of the data center. The PDU offers superior power protection and monitoring, and the flexibility and scalability to match your actual ...

The Liebert FPC power center is engineered to combine the convenience and cost savings of a pre-packaged, factory-tested unit with the flexibility of a custom-tailored power system.

The power plant design incorporates redundancy, eliminating the need for backup diesel generators and reducing CO 2 emissions by about 50 percent. This solution offers investment flexibility and ...

Our Power Distribution Units (PDU"s) are designed for scalability and rapid deployment for modern data centers. Offering increased power density in a compact and ventilated structure, real time monitoring, ...

Housed in a single, self-contained cabinet, it combines distribution, computer-grade grounding, isolation, and power monitoring to provide the protection your vital computer or communications equipment ...

Choose the right cabinet power distribution unit for your data center by considering power needs, outlet types, certifications, and future scalability.

The product has the characteristics of modularity, high reliability, and multiple outgoing line circuits. It can meet the needs of different scenarios and power fields such as data centers and ...
