At Solarvance, we design solar energy systems optimized for Honduras's geography--from the coastal cities to highland villages. Whether you're planning a rural microgrid or a hybrid solution for a ...

Our program model combines Results Based Funding (RBF) from our Non-profit partner Let's Share the Sun, with customer financing from our non-profit partner Kiva to effectively deliver and install solar ...

Grid-tied solar systems. Grid-tied systems are solar panel installations that are connected to the utility power grid. With a grid-connected system, a home can use the solar energy produced by its solar ...

"Having COVID-19 then two hurricanes on top is too much for Honduras," he said. "But the Soluz Honduras team is determined to keep serving rural areas to help reduce energy poverty with resilient ...

The project, which has just begun, will set up a fully-operational electrical system in El Santuario by early 2022 and will serve as a repeatable, scalable model for other remote rural communities.

Our lithium-based energy storage systems are specifically built for hot, humid environments like Honduras. This article explores how we're tackling the unique climate challenges of Central ...

The design and optimization of the isolated photovoltaic system with energy storage for a rural residence were successfully completed, leading to the project's installation.

This report presents the work conducted by the National Renewable Energy Laboratory (NREL) on the rural electrification of Honduras, focusing particularly on schools and clinics and extending to support ...
