How has Japan developed the electric power industry in the ASEAN region?

The electric power industry in Japan has been developed under the coordination of regional power utility companies (grid system operators) that are mutually independent. We consider that lessons learned from Japan's experiences are worth it in considering the development of grid interconnection and power trade in the ASEAN region.

Why is ASEAN Power Grid important?

Remarkable Development of ASEAN Power Grid ASEAN is one of the most dynamic and fastest growing economic regions in the world. It recognizes the critical role of an efficient, reliable, and resilient electricity infrastructure in stimulating regional economic growth and development.

What is ASEAN Power Grid (APG)?

Members of ASEAN Power Utilities/Authorities (HAPUA) recognized such circumstance, so, they established a plan of ASEAN Power Grid (APG) in 1997 as a flagship program under ASEAN Vision 2020 to enhance cross-border electricity trade.

What is ASEAN interconnection masterplan study (aims)?

HAPUA have vitally promoted the ASEAN Interconnection Masterplan Study (AIMS) to formulate the strategy to accelerate the realization of APG. The study consists of two phases - AIMS I and AIMS II - successfully completed in 2003 and 2010.
