Delivering up to 1 gigawatt (GW) of baseload power every day generated from renewable energy, it will be the largest combined solar and battery energy storage system (BESS) in the world.

In a remarkable advancement for renewable energy, the United Arab Emirates, under the auspices of His Highness Sheikh Mohamed bin Zayed Al Nahyan, President of the UAE, has ...

Combining solar power and battery storage, the gigascale project aims to deliver 1 gigawatt (GW) of uninterrupted baseload renewable energy daily. The facility, located in Abu Dhabi, ...

Located in Abu Dhabi, the project will feature a 5.2GW (DC) solar photovoltaic (PV) plant, coupled with a 19 gigawatt-hour (GWh) BESS, setting a global benchmark in clean energy innovation.

As Abu Dhabi accelerates its transition to clean energy, factories are increasingly adopting photovoltaic (PV) energy storage systems to reduce costs and carbon footprints.

Delivering up to 1 gigawatt (GW) of baseload power every day generated from renewable energy, it will be the largest combined solar and battery energy storage system ...

The record-breaking solar power and battery storage project will create over 10,000 new jobs, driving innovation and economic growth

Learn how Abu Dhabi's 24/7 Solar Project combines 5.2 GW PV with 19 GWh battery storage to deliver gigawatt-scale clean power, day and night.
