Tirana-based Vega Solar, which develops, installs and maintains rooftop solar power plants, saw an opportunity to contribute to diversification with battery energy storage systems.

The results of this study are necessary for achieving a flexible, cheaper, and environmentally friendly energy system in Albania.

Spanning 200 hectares, the power station is projected to yield 265 GWh annually and effectively offset over 29,165 tonnes of CO<sub>2</sub> per year, perfectly aligning with Albania's ambitious goal of achieving ...

As Albania transitions toward 60% renewable energy by 2030, purpose-built energy storage cabinets provide the missing piece for grid stability. With proper technology selection and phased ...

While a microgrid is in the on-grid mode, it can receive energy from the main grid, and the energy storage system should make the longest cycle life as its optimal goal, and choose the appropriate ...

As Europe races toward its 2030 renewable energy targets, Albania's Tirana Energy Storage Power Station has emerged as a critical piece in the Balkan energy puzzle.

When you hear "Tirana Power Storage Project," do you imagine giant Duracell bunnies hopping around Albania's capital? Okay, maybe not that whimsical - but this project is electrifyingly important.

Tirana, Albania's capital, has quietly become a hotspot for renewable energy innovation. In 2023 alone, the city announced plans to triple its battery storage capacity.
