Will Turkey grow its solar and wind energy capacity by 2035?

(Photo Credit: Ministry of Energy and Natural Resources, Turkey) Turkey's Minister of Energy and Natural Resources Alparslan Bayraktar said his country will target to grow its total installed solar and wind energy capacity to 120 GW by 2035, up from the 30 GW it has in operation now, under its new Energy Transition Renewable Energy Strategy 2035.

How much solar power does Turkey have in 2024?

As of September 2024, Turkey had installed 18.7 GW of solar, 12.4 GW of wind, and 32.2 GW of hydro power capacity, with renewable energy accounting for 59% of the national electricity mix. It has another 69.6 GW allocated as 43.5 GW of solar and 26.1 GW of wind power plants.

Will Turkey invest in solar energy?

Earlier in July 2024, Turkey announced plans to attract private investment in high technology industries, including solar PV manufacturing (see Turkey Announces \$8,000 Grant Support/MW For Solar Cell Investments).

The Backbone of Ankara's Energy Transition Ankara isn't just about historic landmarks and political debates. Behind the scenes, it's quietly becoming a laboratory for cutting-edge energy ...

The rise of distributed renewable energy (DRE) technologies, like solar panels on rooftops and small solar farms, is creating new opportunities that weren't possible ten years ago. ...

Desk-based review of project-related documentation: Environmental and Social Impact Assessment, Environmental and Social Management Plans, and Stakeholder Engagement Plan; and

The Ankara Solar Energy Storage Power Station demonstrates how innovative energy storage can maximize solar potential while ensuring grid stability. As renewable energy becomes increasingly ...

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, ...

The plan was confirmed by Turkey's energy minister following high-level talks in Riyadh, underlining Ankara's push to accelerate clean power deployment while drawing in long-term foreign ...

But here's the kicker: Ankara's actually wasting enough clean energy during peak production to power 20,000 households. Without proper storage, those solar panels might as well be decorative roof tiles ...

Why Ankara's Energy Storage Plan Matters for Renewable Integration Ankara's ambitious energy storage layout planning scheme positions Turkey's capital as a pioneer in urban renewable energy ...
