What is Apollo solar?

Apollo Solar provides charge controllers, inverters, accessories and monitoring for off-grid homes to provide dependable, reliable electric power under all conditions. Apollo products work reliably in all temperature extremes, from freezing cold to burning hot.

Are Apollo solar off-grid systems reliable?

Apollo Solar off-grid systems increase reliability and reduce power costs in Pure Solar or Hybrid Solar energy systems. Our T80 charge controllers have earned a reputation for great reliability in challenging environments. Our True Sine Wave Inverter can be used in any country, no matter what AC voltage is required.

Where does Apollo solar work?

Works in all environments - jungles, deserts, mountains, coastlines. Apollo Solar is the proven energy leader for remote off-grid telecom sites - from jungle floor to maintaintop.

Why did you choose the Apollo T80 solar controller?

We chose the Apollo T80 solar controller for our 13.8 kW PV project because of a number of factors: simple networking, high temperature thermal management, ease of installation and fast access to high level technical support. We were not disappointed during the installation or commissioning of these controllers.
