Are solar panels illegal?

Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.

Are solar panels a viable option?

However, some states still make installing solar panels functionally impossible by creating laws with "reasonable restrictions," such as increased taxing, energy caps, or even billing solar panel users. Combine these laws with a lack of incentive programs, and solar panels are not viable for homeowners in many states.

Are HOAs allowed to install solar panels?

Currently, 25 states have specific laws limiting HOA restrictions on solar installations. California's Solar Rights Act is among the strongest, prohibiting HOAs from preventing solar installations unless they pose safety hazards. Florida, Arizona, and Texas also have robust protections for homeowners wanting to go solar.

How many solar panels are there in Texas?

With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and energy storage projects in the nation. Ranking 2nd in the nation, Texas has 48.2 GW installed and is expected to continue to grow 76% by 2030, surpassing California.
