OverviewPhotovoltaicsPotentialThermal solarSee alsoExternal linksAs of April 2019 ten 1 MW strong solar stations are installed. Solar and wind stations account for less than 1% of total installed electricity generation capacities. In April 2019 it was announced that German company Das Enteria Solarkraftwerk will build a 2 MW strong solar station near Shorzha at lake Sevan by end of 2020. Currently 9 solar PV plants (total installed capacity - about 7,02 MW) have been put ...

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA).

Armenia adds around 615 MW of solar in 2025 Armenia enjoyed a record year for solar deployment last year, surpassing 1 GW of cumulative solar capacity.

The Eurasian Development Bank (EDB) is financing the construction of 11 solar power plants for \$37 million in the Gegharkunik and Aragatsotn marzes of Armenia. All of these plants are ...

The Masrik-1 Solar Plant, Armenia's largest solar project, became operational in 2022, adding 55 MW of capacity to the national grid. Similar projects, such as Ayg-1 and Ayg-2, are in ...

In particular, at this stage, the significant increase in solar power plants has created certain challenges for managing Armenia's energy system, however, as Abrahamyan emphasized, ...

According to the Minister of Territorial Administration and Infrastructure, large-scale programs are underway to develop and integrate new solar power plants, which will significantly ...

Armenia's solar energy sector is advancing rapidly, marked by the activation of its first floating solar power plant in Yerevan. This 150 kW project is a testament to Armenia's efforts to diversify its ...
