Clean energy innovations are breaking records, but investments in grid and energy storage systems are critical to fully capitalise on them.

As demand for renewable energy surges across North Asia, large-scale energy storage solutions like the North Asia Energy Storage Power Station Project have become critical.

On June 20, 2025, the Shanghai Municipal Government, China Kangfu, and Tesla (Shanghai) Co., Ltd. officially signed a cooperation agreement, and the construction of a GWh-level Energy Storage ...

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

The initiative, valued at RMB 4 billion (approximately \$550 million USD), will utilize Tesla's Megapack energy storage products to establish a grid-connected independent energy ...

Tesla has decided to build its first battery energy storage system (ESS) in mainland China. Despite the escalating trade conflicts that have intensified since the start of the Donald Trump ...

As renewable energy adoption accelerates globally, North Asia has emerged as a critical hub for energy storage innovation. This article explores how manufacturers in the region are addressing grid stability ...

The Megafactory will improve the capacity to produce and deploy large-scale energy storage solutions. This is essential to address the intermittency of renewable energy sources like ...
