Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

Offer up to 800 V DC power supply to directly connect with the battery system, not needing any power conversion; CE/UL certifications for worldwide operations; high energy efficiency and reliability.

Core highlights: The liquid-cooled battery container is integrated with battery clusters, converging power distribution cabinets, liquid-cooled units, automatic fire-fighting systems, lighting systems, pressure ...

HyperCube is a liquid-cooling outdoor cabinet suitable for energy storage. It features high safety, a long lifespan, high efficiency, stability, scalability, and rapid response.

With high energy efficiency and optimized operating and maintenance processes, operating costs are low, making the battery container an economical choice. It also has an impressively long service life, ...

Liquid Cooling Containerized Energy Storage Features SAFE AND RELIABLE Approved industry certification of Cell pass test by UL/TUV/IEC Multi-level design for fire control

It features a high-quality container enclosure pre-installed with a battery rack, allowing clients to integrate their own battery packs, cooling systems, fire suppression systems, and other components.

With advanced liquid cooling technology, our systems effectively manage battery temperatures, ensuring stable performance under high loads and enhancing efficiency and lifespan.
