Advanced compressed air energy storage (A-CAES) technology firm Hydrostor has signed a binding agreement with mining firm Perilya to progress the construction of a project in New South Wales, ...

The project aims to combine large-scale hydrogen production with underground hydrogen storage and compressed air energy storage to accelerate Denmark's green energy transition.

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. [pdf]

The Jinzhai Energy Storage Demonstration Project is the first large-scale energy storage project jointly invested by Shanghai Electric Group, State Grid Comprehensive Energy Company, and China ...

A cutting-edge energy storage facility in Mali's capital that could power 80,000 homes using nothing but compressed air and African ingenuity. The Bamako Air Energy Storage Project isn't ...

10-hour+ LDES. Image: Form Energy. The US federal Department of Energy (DOE) will offer up to US\$100 million for pilot-scale long-duration energy storage (LDES) projects

Compressed air energy storage (CAES) is one of the many energy storage options that can store electric energy in the form of potential energy (compressed air) and can be deployed near ...

The world's first immersion liquid-cooled energy storage power station, China Southern Power Grid Meizhou Baohu Energy Storage Power Station, was officially put into operation on March 6. The ...
