Can regional cooperation advance the Southeast Asian space industry?

One key vector is regional cooperation. Though not new, it has increasingly flourished in the last ten years, especially in three areas: satellite engineering, space policymaking, and space entrepreneurship. Combined, these trends may offer a breakthrough for advancing the Southeast Asian space industry as a whole.

How is Southeast Asian space sector cooperating?

In recent years, we have seen growing regional cooperation in the Southeast Asian space sector, especially in satellite engineering via multi-nation university programmes, space policymaking via new initiatives by longstanding regional space organisations, and entrepreneurship via dedicated space business fora.

What are Southeast Asian space activities?

SYNOPSIS Southeast Asian space activities are steadily intensifying. One key vector is regional cooperation. Though not new, it has increasingly flourished in the last ten years, especially in three areas: satellite engineering, space policymaking, and space entrepreneurship.

Does Beijing have a strong defence relationship with Southeast Asia?

To this end, Beijing has strengthened defence cooperation with most Southeast Asian countries, albeit from a low base. It has found most success in mainland Southeast Asia, where it has become a key defence partner for Cambodia and Laos. Middle powers such as Australia, India, and Japan have also strengthened their defence ties with Southeast Asia.

U. S. Pacific Command-managed efforts focus on multinational cooperation, shared standards. Communications and data interoperability with regional nations are essential for U.S. forces in ...
