What resources are available for EV infrastructure planning & implementation?

This section compiles resources and tools for EV infrastructure planning and implementation. Resources are organized by subject area and are labeled with resource type--namely, calculators and software, datasets and maps, and additional guidance and reference.

What is the EV charging infrastructure program?

The Program was authorized under paragraph (2) under the Highway Infrastructure Program heading in title VIII of division J of the IJA. The Program provides \$5 billion of funding to States to deploy electric vehicle (EV) charging infrastructure and establish an interconnected network to facilitate data collection, access, and reliability.

Why do EV charging stations need to be open-loop?

plexity and inconvenience to the charging experience and hinders EV adoption. Existing legislation such as the EU's Alternative Fuels Infrastructure Regulation (AFIR) and the US's National Electric Vehicle Infrastructure Formula Program (NEVI) require charging stations to have contactless, open-loop payments as standard.³⁸ This makes charg

Why should EV charging infrastructure be standardized?

sing on outcomes rather than limiting funding to traditional business models. Standardization of charging infrastructure is also critical to ensure reliability and accessibility for all vehicle models, enabling an sive charging experience for all EV users, residents and visitors alike. DataData plays a crucial role in shaping how c

"We have approved plans for all 50 States, Puerto Rico and the District of Columbia to help ensure that Americans in every part of the country - from the largest cities to the most rural ...

This paper considers multiple electricity-hydrogen integrated charging stations (EHI-CSs) as a unit consisting of photovoltaic systems and HES systems for charging plug-in electric vehicles and ...

Electric vehicles (EVs), as a critical component of sustainable cities, require a thorough understanding of the spatiotemporal distribution of charging demand. This paper proposes a ...

This notice announces the availability of FHWA's revised National Electric Vehicle Infrastructure (NEVI) Formula Program Interim Final Guidance. This Interim Final Guidance updates ...

It provides a certain reference for the location planning of urban electric vehicle charging stations and battery-swapping stations.

This section compiles resources and tools for EV infrastructure planning and implementation. Resources are organized by subject area and are labeled with resource ...

To bolster grid stability and future-proof infrastructure, city governments should encourage the private sector to adopt bidirectional charging, particularly at fleet and large-vehicle charging sites.

Pennsylvania National Electric Vehicle Infrastructure (NEVI) Round 1 Conditional Awards - Updated September 2023 (New projects identified in blue.) Allegheny County
