What is a BESS battery energy storage system?

A BESS (Battery Energy Storage System) battery system is very necessary in nowadays. It can supply electricity for daily use during power failures. The system can also store grid energy, especially renewable energy. The cost savings from this could be passed on to customers.

What are the advantages of a Bess energy storage system?

BESS can also provide advantages over other energy storage systems, including greater efficiency and flexibility, faster response times when powering equipment or devices, and lower costs overall. BESS relies on one or more batteries to store energy, which can then be used at a later time.

Is Con Edison putting the largest battery energy storage system in New York City?

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help meet summer electricity demand peaks. The installation is a 7.5-MW/30-MWh system located at a substation in the Fox Hills area of Staten Island, New York (Figure 1).

How many energy storage systems are there in New York City?

Con Edison has said it is working to promote the efficient operation of 1,000 MW of energy storage in the New York metropolitan region by 2030. The company reported there were 493 customer-owned BESSs installed in New York City and Westchester, a county north of the city, as of March 2023. The total capacity of those systems was about 25 MW.

Battery energy storage is rapidly transforming the U.S. power landscape. In 2025, utility-scale battery storage is projected to expand by a record 18.2 GW, following a historic 10.3 GW added ...

At U.S. BESS, we are at the forefront of energy storage solutions in the United States, committed to providing the safest and most reliable systems available. Our products serve a wide range of needs ...

ArcLight and Elevate Renewables will deploy a 15MW/60MWh BESS unit at the Arthur Kill Power Station on Staten Island, New York City.

CS Energy and Calibrant Energy have successfully completed a series of three battery energy storage systems (BESS) in Westchester County, New York. These projects, strategically ...
