Punakha--After months of delays caused by incessant rain and prolonged monsoon, Phase II of Bhutan's first utility-scale solar power plant in Yongtru, Sephu Gewog, is finally online, ...

"The energy generated from this solar farm is primarily intended to complement hydropower during the lean season, reducing Bhutan's reliance on energy imports from India," ADB ...

Given the projected dry season deficits (Figure 2), solar power is the best-placed generation technology in Bhutan which can help reduce dry season imports during the daytime given the faster construction ...

Major ventures such as the Sephu Solar Power Plant in Wangdue Phodrang and the Jigmeling project in Sarpang complement rooftop systems, floating solar, hybrid solutions, and solar-powered water ...

Complementing the CPS, the NSER sets out a clear pathway to achieve Bhutan's national solar energy targets. Developed with ISA's support, the roadmap identifies potential solar ...

The healthcare sector, with facilities dispersed across challenging terrain, is particularly vulnerable to energy insecurity. Bhutan's RE Master Plan (2017-2032) identifies 39,462 MW of potential small ...

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), the roadmap focuses on deploying large-scale ...

The broader program includes installations on rooftops, carports, small-scale ground-mounted platforms, and a pilot agrivoltaic system--a combination of agriculture and solar power ...
