The 3A model is a standard solution, designed for convenient wiring and easy installation on higher-capacity prismatic cells. This model also has a possibility to...

One of the primary functions of a BMS in prismatic lithium - ion batteries is voltage monitoring. Prismatic lithium - ion batteries are often composed of multiple cells connected in series ...

Shop LiFePO4 prismatic cells, BMS, DIY kits, spacers, and insulation supplies. Build reliable energy storage systems with trusted components.

In prismatic cells, there is a potential weak point where the largest surface of the cell is in the same plane of chemistry's expansion and contraction. This requires some external pressure ...

Our EVE LiFePO4 cells are 100% brand new Grade A with original label and factory QR code which are directly from EVE factory. They have well matching voltage, capacity and resistance from factory.

Follow our step-by-step guide to construct your own DIY 12V LiFePO4 battery. Learn about battery cells, BMS, fusing, wiring, and more.

I am contemplating building a battery array for a Volvo EV conversion, using 48 Prismatic cells in series. Can anyone recommend a BMS that's simple and inexpensive (relatively) in a 48S ...

I'm looking for advice on how to set up my BMS and charger. Here are the details of the module from the seller: "Prismatic Cells are 3.2v and 22.5ah each. At 22.5ah each they are very stable cells and can ...
