Should classroom doors be locked?

The goal is safety for every student and staff member, in every situation, every day. One approach for school safety can be as simple as a locked door. Security experts and PASS, the Partner Alliance for Safer Schools, agree that classroom doors should be closed and locked whenever students are in the classroom.

How do I know if my classroom is locked or unlocked?

Visual indicators to show locked or unlocked status. Unlike the traditional classroom lock, the classroom security function is locked from the inside of the classroom with a key. Teachers do not have to exit the classroom in order to lock the outside lever; the locking function can be accessed from both sides.

What constitutes safe door locking in schools?

There are many misconceptions around what constitutes safe door locking in schools. In the most recent edition of NFPA 101, Life Safety Code, there is one option provided for locking classroom doors from the inside. The hardware for this option is sometimes called an interconnected latch or lock and is similar to what you might see in a hotel room.

What happens if a school door is unlocked?

If the door is unlocked and a school lockdown occurs, however, the teacher must open the door, step into the hallway, lock the door, step back inside the classroom, and close the door - a time-consuming process with a potentially dangerous exposure.
