By integrating advanced energy storage solutions with meaningful Indigenous partnerships, this project enhances Ontario's clean energy grid and sets a global benchmark for ...

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed ...

A 2022 report titled Energy Storage: A Key Pathway to Net Zero in Canada, commissioned by Energy Storage Canada, identified the need for a minimum of 8 to 12GW of ...

This project is a strong validation of our full-stack delivery model, which combines our proprietary SolBank technology with turnkey EPC execution to deliver bankable, grid-ready energy ...

One of the biggest clean energy storage facilities in the world -- the Oneida Energy Storage Project in Ontario -- connected to the grid this month. It's a big clean energy win, but it's ...

With provinces like Alberta and Ontario already making significant strides in grid-scale storage projects and others like British Columbia and Nova Scotia setting aggressive targets, the ...

Tesla Megapacks are now live at a major new battery energy storage system (BESS) in Ontario, marking another milestone for grid-scale storage in Canada and Tesla's rapidly growing ...

ESC's report predicts that Canada's energy storage outlook for 2050 is between 20GW and 40GW, taking into account both short-duration and long-duration energy storage (LDES) ...
