Whether you're upgrading your home solar system or planning a full off-grid setup, Sigenergy gives you the performance, control, and backup power you need.

The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy transition by enabling greater introduction of ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid demand, and ...

Explore Canberra's bold microgrid and solar battery push -- community and grid-scale storage, peak demand reduction and renewable energy solutions with expert solar support.

The project will deliver an ecosystem of batteries across the ACT to ensure its electricity grid remains stable, and will help to future-proof the state's electricity security.

The ACT Government has reached a major milestone in its work to future-proof Canberra's energy supply. The development application has been approved to deliver Stream 1 of ...

Energy Storage is critical for ACT's 100% renewables and net-zero target. Helps to put downward pressure on electricity price paid by ACT consumers. Reduces the need for electricity network ...

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...
