In December last year, at the COP28 talks, GEAPP launched the Battery Energy Storage System Consortium (BESS Consortium), through which 11 countries, including India, pledged to facilitate ...

Building fully integrated regional grids, long-distance transmission lines and grid-scale storage technologies is imperative for Southeast Asia so that countries can start capitalising on their ...

Launched in 2015 with a 50 MW installed capacity (later expanded to 100 MW), it became the first utility-scale solar farm in Central Asia. The project was financed by the EBRD and the Clean ...

a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS) in Uzbekistan -- Central Asia's first renewable energy facility with a utility-scale battery storage ...

ADB, together with ACWA Power Company, Sumitomo Corporation, Chubu Electric Power Co. Inc., and Shikoku Electric Power Co. Inc., has signed a landmark financing package to ...

Smoothly integrated with renewable generators, our utility-scale batteries help to provide clean, reliable, and cheaper power in grids and to off-grid communities.

Long duration energy storage is key for high shares of solar PV and wind energy in the region. An open-access, integrated water and energy system model of Central Asia is developed.

Kyrgyzstan has launched its first 100-megawatt (MW) utility-scale solar power plant, a \$56 million project that immediately adds a new, non-hydro source of firm capacity to the national grid.
