Catch up on today's latest EV charging station news about charging networks, new technology, station reviews, manufacturer updates, data analyses, and more.

Rivian is finally opening up its charging network to non-Rivian EVs, starting with a new station in Joshua Tree National Park.

The company has announced that it's building its first US-based charger production factory in Texas "in response to the growing demand for EV charging stations across North America."

Indian carmakers are speeding up deployment of electric vehicle chargers as the world's No. 3 auto market prepares for new model launches this ...

The Biden administration says that the number of EV charging stations in the US has doubled since 2021 as it announces another round of grants for states looking to install more ...

ChargePoint is launching cut-resistant cables and a new Protect alarm system to fight vandalism at electric vehicle stations.

The app is also used with the company's commercial charging stations, which will no longer work anyway since they require external software to operate.

There are now almost 8,200 quick-turn EV stations across the country, or one for every 15 gas stations. Tesla is responsible for slightly more than one quarter of them.
