China's relentless pursuit of Africa's lithium resources has propelled it to the forefront of the global lithium market. As the demand for lithium-ion batteries surges, securing access to lithium ...

With the global shift to electric vehicles (EVs) accelerating, China is cementing its dominance over the lithium supply chain by pouring investment into African mines, creating a new center...

Chinese miners and refiners are driving a significant increase in African lithium production, pushing forward despite concerns of an oversupply to secure future resources of this essential battery metal.

Faced with China's dominance of the lithium supply chain, western officials are pitching their investment offer to African countries as a more socially responsible alternative.

China's early move to tap new centers of lithium supply across Africa is reaping rewards, helping the top electric-vehicle battery producer navigate a tight market for the key metal.

African lithium reserves are critical to meeting future demand requirements. Driven by capacity additions in Zimbabwe, Mali and Nigeria, African lithium production is forecast to grow at a ...

Across Africa, 15 mines are under development or being expanded and are due to be produced by 2030. Chinese miners and refiners are driving a surge in African lithium output, ...

China has established itself as a dominant force in Africa's mining sector, with a strategic focus on securing essential resources for its manufacturing and energy transition goals.
