Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025.

China has unveiled an ambitious plan to significantly enhance its energy storage capacities, aiming to achieve 180 gigawatts (GW) of installed battery energy storage systems (BESS) ...

Both regions have rolled up their sleeves to tackle grid instability and renewable intermittency through bold policy frameworks. But here's the kicker: China-Europe energy storage ...

China continued its high-growth energy storage market expansion in July 2025, with 1,556 new energy storage-related projects filed for registration, according to the Energy Storage...

Chinese storage providers aren't just exporting products - they're establishing new operational blueprints that European utilities are scrambling to adopt. With 56.5 GWh of global contracts secured ...

Sungrow is introducing its large-scale energy storage system, PowerTitan 3.0, to Europe, featuring grid-forming capability, next-generation battery cells, DC coupling for co-located solar ...

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to 180GW by ...

China has a goal to install 180 gigawatts of battery energy storage systems by the end of 2027, with a direct project investment of \$35.2 billion. Large-scale battery storage systems are ...
