According to a new analysis of China's solar panel exports data from energy think tank Ember, solar panel imports into the continent jumped 60% in the 12 months through June 2025, ...

Africa's solar imports from China hit 15 GW in 2025, up 60%. Record growth signals a clean energy boom, but capacity still lags global pace.

Located in the town of De Aar in South Africa's Northern Cape Province, the project will have a total installed capacity of 342 megawatts, making it the largest single-unit solar power plant in South ...

Some of the biggest completed projects include the Olkaria IV geothermal power plant and the 50-megawatt Garissa solar park. Between 2010 and 2024, a total of 44 Chinese projects ...

Powerchina has switched on a 100 MW solar tower in South Africa. The concentrated solar power (CSP) project will supply 480 GWh of clean energy to the country's power grid each year.

African solar energy use is surging, with Chinese-made panels a common sight across the continent, on rooftops and in the massive renewable energy plants being built in countries such as...

At the first African Climate Summit in September 2023, China announced that it would launch an "Africa Solar Belt" program with 100 million yuan (about 14 million U.S. dollars) in funding for solar projects ...

It is not only the first CSP project in sub-Saharan Africa, but also one of the largest renewable energy investment projects in South Africa's Northern Cape Province. It adopts advanced ...
