Our containerized and trailer-mounted lithium battery systems are built to replace diesel generators with zero-emission, high-capacity electric power.

The 5KW/5kwh mobile energy storage trolley integrates energy storage batteries and hybrid inverters, which is equivalent to a small mobile power station; as a distributed energy storage power source, it ...

Power Station provides a flexible, pre-engineered energy storage solution ...

Power Station provides a flexible, pre-engineered energy storage solution consisting of a standard ISO container with integrated electrical, mechanical, and thermal management features.

Engineered for durability and ease of use, our mobile power station combines robust performance with eco-friendly energy delivery. Whether in remote locations or demanding environments, it offers a ...

CESS-L5016 integrates high-life batteries, battery management system, thermal management system, active safety management system, and intelligent power distribution system into a 20-foot standard ...

Featuring phase-change energy storage, a mobile thermal energy supply system (M-TES) demonstrates remarkable waste heat transfer capabilities across various spatial scales and temporal durations, ...

All required batteries, power converter systems and all that you need is in one box, enabling you to reduce maintenance costs. Designed for plug and play, the full range of 10 feet and 20 feet high cube ...
