-----

With its growing renewable energy sector and unique geographical challenges, Colombian energy storage containers are emerging as game-changers. In 2024 alone, Colombia's ...

Wind farm projects permitted, and Transmission Line environmental license delayed and now expected in February 2025 with 100% of communities protocolized

The new mechanism introduces technology-specific products, extends commissioning deadlines to 2035, and formally recognises energy storage as a core asset for power system ...

Colombia's wind energy plans in La Guajira are faltering as major companies exit and projects remain stalled.

The roadmap of the future of offshore wind energy in Colombia must be to fulfill three primary objectives identify the best opportunities for harnessing the offshore wind resource, to improve the investment in ...

Supported by system dynamics modeling, this paper presents four scenarios that explore possible futures for wind capacity deployment in Colombia between 2020 and 2050.

The National Energy Plan (PEN) 2022-2052 defines Colombia's energy policy and includes five different scenarios that consider solar and wind energy, both for grid-connected and off-grid areas.

Colombia has some of the best natural conditions for offshore wind in the world and there is already abundant private sector interest in developing projects. Colombia has an opportunity to use this ...
