The Vertiv(TM) EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. Purpose-built for critical backup and AI compute loads, they ...

Ideal for the largest batteries and larger operators, such as leisure equipment companies and storage warehouses, this Lithium-ion battery cabinet is the biggest and, if we say so ourselves, the best.

The 18U 600mm Wide x 600mm Deep PI Data enclosure/cabinet has been designed to ensure maximum rigidity and weight loading without compromising the versatility of the solution.

The battery cabinets are available in five different mechanical dimensions. They can facilitate multiple combinations of batteries, up to 63 battery blocks, connected in series and parallel configurations ...

Comparing new buildings to retrofitted situations, the room size and environmental systems may dictate your battery selection. Rooms initially sized for smaller battery types or designed with specific ...

Due to the density of the Vertiv EnergyCore design, only two lithium-ion battery cabinets are needed to support each 500kW Trinergy UPS core, versus the three cabinets that are required ...

Engineered for use with most type of battery terminal models, these cabinets can fit a wide variety of applications. This solution is completely customizable and flexible to support your application ...

Basic configuration for our 600mm wide cabinets include, Bolted steel construction, Lockable removable Side Panels, Lockable Doors in Steel, Mesh or Perspex, 4 x 19" Vertical Mounting Rails - ...
