Should you buy a solar generator?

Product news, reviews, and must-have deals. Solar generators can make your life a little easier on a good day or save you on a bad day. These powerful power packs offer huge battery capacity that can fuel large devices and even appliances in a pinch. They're great in an emergency, but they're also essential tailgating and camping equipment.

Are solar-powered generators worth it?

Solar-powered generators used to be a niche product geared towards off-the-grid living. They still do the job in that scenario, but as the market matures, with an ever-expanding range of sizes and configurations, the quiet, emissions-free generators are becoming an essential source of backup power for all kinds of homeowners.

What is the best portable solar generator of 2025?

If you want to save a few bucks and don't mind half the solar input, check out the non-Plus EcoFlow Delta 3, which offers nearly all the same specs and expandability as the Plus model, but only half the solar input. The 114-pound king-sized candy bar of the EcoFlow lineup is our best large portable solar generator of 2025.

Why should you buy a solar generator?

While a generator with solar panels can be useful for anyone who travels and stays in remote off-grid places, it can also serve as a reliable backup energy source in case of a natural or man-made disaster. If the primary purpose is travel, look for solar generators that help make traveling simpler.
