---

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% ...

Corrosion remains a persistent challenge for the power generation sector, but the use of advanced anti-corrosion protective covers offers a viable preventative strategy.

This offshore power generation container adopts a standardized container structure and integrates high-efficiency generator sets. Its shell undergoes special anti-corrosion treatment, enabling long-term ...

Our line of containerized generators is easily configurable to the needs of any application, from rental to disaster relief to mining -- with a whole host of value-added standard features, options and ...

ZERUST® provides corrosion prevention solutions to protect critical power generation equipment, including gearboxes, turbines, heat exchangers, piping systems, and electrical enclosures.

Corrosion is a widespread concern that extends far beyond maritime settings, significantly affecting the longevity and efficiency of power generation equipment.

Report Summary This report details the comprehensive and long-lasting anti-corrosion treatment processes applied to our containerized diesel generator sets.

Originally launched for limited markets in 2021, the 40-ft ...
