When did foldable shipping containers come to light?

Business establishments and freight and transport operators got so used to rigid shipping box containers that foldable containers never came to light until about 2008. Imagine flat-packing your empty shipping containers and stacking them when not in use or during transportation.

How long does it take to fold a container?

Folding and unfolding of such containers take only ten minutes and four folded containers are connected or 'bundled' together to form a single unit. These bundled single units are then handled like a single container using normal MHE.

Could a seafold 40' container slash the cost of repositioning empty containers?

More than a fifth of containers are returned empty to their port of origin empty, according to estimates. CCS claims that the SeaFold 40' box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon emissions by 70%.

How popular is a foldable container?

As previously noted, the foldable container is now used at more than 60 depots and ports and on 15 shipping lines and growing in popularity all the time. "The shipping industry is typically very conservative," said Broekhuis.
