How many people in eastern DRC will have access to electricity?

As a result, over 28,000 households and businesses in eastern DRC will have access to more affordable and reliable electricity. "Though it was a complicated transaction, MIGA worked diligently to innovate and provide guarantees to de-risk this metro-grid investment," said Jessica Stiefler, Senior Underwriter and Distributed Energy Lead at MIGA.

How much electricity does the DRC have?

1 No more than 17 percent of the DRC's population has access to electricity according to household surveys reviewed for the 2019 Tracking SDG7 report, while official government statistics place that rate at 9 percent.

How does the World Bank support DRC?

Through the Electricity Access and Service Expansion project, the World Bank supports DRC's efforts to improve infrastructure governance by building the capacity of key power institutions as well as institutional and regulatory strengthening. This is a crucial step to support DRC's goal to provide electricity to 26.5 million households by 2030.

What is the main priority for the Democratic Republic of Congo's power sector?

The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The Democratic Republic of Congo is a large country with 10 million households of which 1.6 million have access to electricity. This makes it the third largest population in the world without access to electricity.
