Meanwhile, battery swapping (BSW) service for Electric two-wheelers (E2Ws) is a burgeoning method to address the issue of E2Ws refueling in urban areas. The authors spotted ...

In this paper, a distributed collaborative optimization approach is proposed for power distribution and communication networks with 5G base stations. Firstly, the model of 5G base ...

The future of energy is being built now, and Distributed Generation is an essential piece of this puzzle. The commitment to sustainability and innovation will shape not only how we consume ...

Our study introduces a communications and power coordination planning (CPCP) model that encompasses both distributed energy resources and base stations to improve communication quality ...

Our study introduces a communications and power coordination planning (CPCP) model that encompasses both distributed energy resources and base stations to improve communication ...

Pursuant to Brazilian laws, DG refers to the renewable power generation by captive customers of a certain utility based on on-site or off-site power plants connected to such utility's distribution grid. In ...

In 2022, Brazil surpassed the mark of 10 GW of installed power in distributed micro and mini-generation, enough to supply approximately 5 million Brazilian residential units, that is, to serve ...

One of the most important regulatory issues in Brazil's 2025 Agenda is the restriction of solar and wind plant energy due to the lack of capacity of the transmission systems and the supply of ...
