Why are governments putting trillions into wind & solar subsidies?

Governments, especially in the West, are pouring trillions into subsidies for wind and solar despite their hidden costs, raising consumer costs and undermining economies.

Should wind and solar subsidies be double this year?

According to an analysis by Cornwall Insight, an energy consultancy, subsidies to the developers of wind and solar over the next two years need to be at least double this year's record level if the government is to reach its clean power goal by the end of the decade. The London Times reports:

Will the US spend \$421 billion on wind and solar energy?

The United States, under the Biden-Harris climate bill, the Inflation Reduction Act, is expected to spend \$421 billion between 2025 and 2034 in subsidies for wind and solar energy that is rapidly deindustrializing European economies, which have been leading the charge towards "net zero."

Why are wind and solar energy so expensive?

Wind and solar energy are expensive, with many hidden costs in massive subsidies, government mandates, payments for discarded energy, transmission line additions, and health costs due to noise and vibration, among other non-direct costs.

Subsidies, rebates and incentives When calculating your credit, you may need to subtract subsidies, rebates or other financial incentives from your qualified property expenses because they're ...

Discover how government subsidies for renewable energy, including solar and wind, are reshaping the energy landscape post 2022, reducing costs and shifting away from fossil fuels.

One of the most effective strategies they use is offering financial incentives and subsidies for individuals, homeowners, and businesses adopting solar power. These benefits reduce upfront ...

Many states have programs that provide additional subsidies or incentives for renewable energy projects. For example, several states offer performance-based incentives, rebates, or even property ...
