In 1990, at age 36, recently widowed Dong left her three-year-old son to his grandmother and quit her job at the government research facility in order to move to the more economically developed Shenzhen in Guangdong province and to find a new job, but moved to Zhuhai soon. Joining Haley (Gree Electric's predecessor) as a salesperson, she worked for four years as an air-conditioner saleswoman. "Sent to a poor province, Anhui, she produced one-eighth of Gree's an...

Based on this, Dong Mingzhu's "air conditioner as a power station" is more of a marketing technique than a scenario that can actually be implemented. For example, Dong Mingzhu said, "There is no ...

It allows air conditioners to use solar energy to generate electricity while using electricity, and ensures that solar energy is used first. In the same year, this technology was identified as "the ...

Dong Mingzhu, this name is like a dazzling star in the business circles of the mainland, shining brightly. She went from an ordinary workshop worker to a counterattack all the way, and ...

With her visionary strategies, Dong Mingzhu has not only steered Gree Electric to remarkable success but has also emerged as an inspiring role model for aspiring entrepreneurs ...

As China continues its economic growth, most industry titans share one common trait: they're men. But one woman stands apart: Dong Mingzhu, the undisputed leader of GREE Electric ...

There are two primary ways that solar air conditioners collect and use energy: through solar photovoltaic (PV) systems and solar thermal systems. Materials Required.
