Will China improve EV charging infrastructure?

BEIJING, Oct. 15 -- China unveiled a three-year action plan on Wednesday to improve its electric vehicle (EV) charging infrastructure, as part of its broader efforts to boost consumer confidence and accelerate EV adoption nationwide.

Does charging an EV really matter?

Whenever you plug your EV into a DC fast charger, it kicks up fine particles that pollute the air. But how much does it really matter? Fewer EV drivers have to deal with broken chargers, but owners aren't thrilled with the costs, especially at Tesla Superchargers.

Do EV owners still use public chargers?

In addition, the majority of EV owners with home chargers still use public chargers weekly. The share of fast chargers in the United States grows from less than 30% in 2024 to 40% in 2030 in the STEPS, meaning that the available public charging capacity per electric LDV grows to over 1.5 kW per EV.
