Are electric vehicles a good investment in Brazil?

Escalating gasoline prices in Brazil, soaring from \$1.05/L in May to \$1.17/L in June 2023, are prompting a surge of interest in electric vehicles (EVs). The potential for long-term fuel savings with EVs becomes an attractive proposition amid volatile oil prices, prompting buyers to make the shift for economic stability.

Which region will dominate the global electric car market?

Among regions, North America is expected to dominate the global electric car market thanks to strong government support schemes and consumer incentives. The Asia Pacific market is also growing rapidly due to tough emission norms and bans on combustion engine vehicles planned in certain countries.

Where do EVs come from in Brazil?

BYD is Brazil's most prominent electric vehicle brand, with popular models such as the BYD Dolphin and the JAC E-JS1. However, most EVs in the country are imported, mainly from China. Although there are initiatives to produce EVs locally, imports still dominate the market. Charging Infrastructure

Why is the global electric car market growing?

Global electric car market is set to grow significantly driven by stringent emission norms which are forcing automakers to shift towards electric vehicles. Governments across regions are also providing substantial subsidies and tax rebates to promote electric vehicle adoption.
