In this post, RMP will explain how our new map showcases the lithium-ion battery supply chain with real and substantive data.

The document updates DOE's Energy Storage Grand Challenge Roadmap and reflects significant advances in energy storage technology and deployment since 2020, the agency said.

NREL has developed the database with funding from NAATBatt International--a trade association of more than 220 companies that promotes the development and commercialization of electrochemical ...

Lithium-ion batteries (LIBs) are used in a wide range of applications, including cell phones, electric vehicles (EVs), and grid storage, and are essential for economic growth and addressing climate change

Energy storage batteries are manufactured devices that accept, store, and discharge electrical energy using chemical reactions within the device and that can be recharged to full ...

The White House, Department of Energy (through MESC), and other agencies are continuing to engage and coordinate with industry on supply chain challenges through the American Battery Materials ...

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more comprehensive assessments and descriptions of the ...

This document outlines a U.S. national blueprint for lithium-based batteries, developed by FCAB to guide federal investments in the domestic lithium-battery manufacturing value chain that ...
