What are MTU gas generator set containers?

MTU gas generator set containers contain a highly powerful engine as well as a range of intelligent components and an intuitive interface that gets you up and running in no time.

How long is a hydrogen generator container?

Find out more about our hydrogen solution here. Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions.

What is eco° Gen-C?

our eco° GEN-C series features all-in-one packaged power generation solution, engineered for mobility, easy deployment and scalability each power container is engineered to meet specific application requirement, customisations to include: engine type, noise level control and power capacity

Are Jenbacher containers available for gas engines?

Jenbacher containers are available for Type 2, 3, 4 and 6 gas engines. Our containerized solutions ensure excellent reliability for your power and heat generation needs.

Containerized plug-and-play power generation modules (PM) are a convenient and efficient solution for various power generation needs. These modules are housed in a shipping container, making them ...

ELCOS offers the possibility of installing power generators inside CONTAINERS Iso Range 20/20HC" - 30/30HC" - 40/40 HC" according to the customer's requirements. All the CONTAINERS can be ...

In this article, we explore the critical role of power generation freight forwarders, particularly those in the Overseas Project Cargo Association (OPCA) network, and provide key insights into the logistics ...

The whole equipment and components are installed inside containers which are adopted for easy transportation and installation at any place defined by the client. The containers are equipped with a ...
