How can project finance help a clean technology sector?

Investments in the clean technology sector often combine capital intensity with new technologies. Securing project finance can prove to be a critical step in the path to commercialization.

What is project finance?

Project finance forms the backbone of renewable energy financing, providing a structured approach to funding capital-intensive infrastructure investments while managing risks through careful allocation among stakeholders.

Can a solar project be financed without a long-term PPA?

While the wind power market has matured significantly in the past five years, leading to the successful project financing of "merchant" projects in the absence of long-term PPAs, Solar Projects are generally not yet able to be project financed in such a manner.

Can a pass-through lease monetize solar energy credits?

Pass-through leases, used extensively to monetize the rehabilitation tax credit, have been used recently to monetize solar energy credits (and more recently Treasury grants). Typically, an entity ("Owner") would acquire a solar energy project from a developer at fair market value.

The Clean Electricity Investment Credit is a credit available under the investment tax credit businesses and other entities that invest in a qualified clean or renewable energy facility or energy storage ...

Part I of the primer introduces project finance to those that may be less familiar with the concept, and asks questions that will assist investors and developers in determining whether project finance is ...

A municipality develops and owns a front-of-the-meter project, potentially financed with tax-exempt municipal bonds, and sells the power to the utility to incorporate into its grid mix to serve ...

A detailed economic analysis is presented, noting the dramatic decline in PV costs and the emerging business models and return on investment (ROI) for integrated systems.

While this document provides a general approach to selecting a financing mechanism for renewable energy
