The company claims its grid-scale sodium-ion battery system can hold 3.1 megawatts hours of energy and operates at temperatures ranging from -40 to 131 degrees Fahrenheit (-40 to +55...

A new generation of sodium-ion batteries, developed and manufactured in Estonia, offers a safer, more sustainable, and more affordable alternative to lithium-based energy storage systems.

This innovative product is now available for order, providing homeowners with a sustainable and efficient energy storage solution. The Freen Home Energy Storage is designed to provide reliable power ...

Maximize your energy independence and efficiency by combining Freen vertical axis wind turbines with Freen sodium-ion battery storage. This integrated system ensures clean, reliable power.

The innovations in the battery technology are reshaping the landscape. Estonian renewable energy company Freen OU is taking a bold step forward with its newly launched 10kWh ...

Freen's sodium-ion battery is designed to integrate seamlessly with renewable energy sources such as rooftop solar panels and small wind turbines, providing homeowners with a reliable...

The Freen Energy Storage Solution introduces the 7.5 kWh and 10 kWh Sodium Battery Pack with integrated Battery Management System (BMS) to deliver a consistent energy supply and ...

Freen O&#220; has launched its latest generation of sodium-ion battery storage systems, the Freen-BSH and Freen-BSL models, developed in Estonia. These scalable batteries cater to ...
