The Jambur Solar Power Station (JSPS), is an operational 23 MW (31,000 hp) solar power plant in Gambia. The power station began commercial operations in March 2024.

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant and an eight ...

This project component consists in the construction of a new 23 MWp solar park tied with 8MWh battery storage and aims to revolutionize power generation in the Gambia by serving as a ...

The Gambia currently has an installed power generation capacity of over 100 MW, yet only generates around 40 MW and faces demand exceeding 50 MW. To address this, the government is launching a ...

The Gambia Solar Energy Project - Initiated in 2007 and completed in 2012, this project was implemented by the University of Strathclyde's Department of Electronic and Electrical Engineering to ...

Access to clean energy in the Gambia is set to be transformed under a new EUR 142 million initiative to harness solar power and supply clean energy across the country, backed by the EIB, World Bank ...

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current ...

Jambur Solar Power Station, is a component of the "Gambia Electricity Restoration and Modernization Project" (GERMP), a US\$165 million infrastructure project financed by the European Investment Bank (EIB), the European Union (EU) and the World Bank (WB). The GERMP comprises the erection of the 23 MW JSPS, the construction and connection of an 8MWh battery energy storage system (BESS), the improvement of transmission and distribution electricity network in the country and the improvement o...
