These innovative aircraft utilize solar panels to capture sunlight, which is then converted into electricity to power their propulsion systems.

Yes, you can take a solar generator on a plane--but strict airline regulations apply. As solar-powered travel gains popularity, adventurers and remote workers increasingly rely on portable ...

Learn if you can take a solar generator on a plane, including TSA rules, battery limits, and travel tips.

Flying with a solar generator can be a convenient way to power your devices while on the go. However, it's essential to understand the regulations and guidelines set by airlines and aviation ...

In the context of aviation, solar energy can be harnessed using photovoltaic cells, commonly known as solar panels, which convert sunlight into electricity. Solar-powered aircraft utilize ...

Airbus, we are harvesting the sun's energy to power the high-endurance, solar-powered stratospheric flight of unmanned aerial vehicles.

In 2010, Solar Impulse 1 made history with the world's first solar-powered overnight flight. This 26-hour flight showed the plane's ability to use and store solar energy well.

The Solar T62 Titan is an American gas turbine engine used mainly as an aircraft auxiliary power unit (APU), conventional power generator, turboprop engine for fixed-wing aircraft or turboshaft engine for ...
