How does Georgia Power work with the Georgia PSC?

Georgia Power continues to work with the Georgia PSC to procure and develop BESS projects across Georgia.

Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

What does Georgia Power do?

"At Georgia Power, we work with the Georgia PSC and many other stakeholders to make the investments required for a reliable and resilient power grid, integrating new technologies to better serve our customers today and as Georgia grows," said Rick Anderson, senior vice president and senior production officer for Georgia Power.

In September, Georgia Power secured a battery and equipment supply agreement (BESA) with Tesla, using the company's 3.9MWh 2XL Megapacks for the four BESS projects.

Georgia Power has unveiled ambitious plans to invest significantly in new generation capacity and battery energy storage systems (BESS) across the state--particularly in Floyd and ...

The facilities will be located in Georgia, specifically, in Lowndes, Bibb, Floyd and Cherokee Counties. Furthermore, Georgia Power will develop the projects using the same ...

This setup allows Georgia Power to use existing infrastructure, reducing costs and avoiding lengthy construction timelines. The project is being handled by Burns & McDonnell and is ...

The planned BESS facilities are the Robins BESS in Bibb County with 128MW capacity, co-located with an
