EFIS-D-W50/100 is designed for small-scale industrial and commercial energy storage. Featuring a modular, factory pre-assembled design, it requires no on-site installation or debugging.

It is suitable for microgrid scenarios such as small-scale commercial and industrial energy storage, photovoltaic diesel storage, and photovoltaic storage and charging.

Standardized Structure Design: Includes energy storage batteries, power conversion systems (PCS), photovoltaic modules, and charging modules in a compact and highly efficient cabinet.

Integrates photovoltaic and wind energy to reduce carbon emissions and lower energy operating costs. Wall-mounted and pole-mounted installation is facilitated by compact design, making it simple to ...

Cooperate with solar panels to form an energy-saving and green photovoltaic storage system, making it easier to build an independent energy storage system for residential and commercial use.

Engineered to seamlessly integrate into your home, these cabinets offer a sleek and organized solution for your energy storage needs. With secure compartments and modern design, our cabinets provide ...

These three parts form a microgrid, using photovoltaic power generation to store electricity in the energy storage battery. When needed, the energy storage battery supplies the ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...
