Sheep graze beneath solar panels at a photovoltaic park in the Talatan Gobi Desert in Gonghe county, Hainan Tibetan Autonomous Prefecture, northwest China's Qinghai Province.

A flock of sheep graze between solar panels at a solar photovoltaic power plant in Gonghe County, Hainan Tibetan Autonomous Prefecture in northwest China's Qinghai Province, April 15, 2024.

A groundbreaking study by researchers from Xi'an University of Technology reveals that the Gonghe Photovoltaic Park in Qinghai Province's Talatan Desert does more than generate clean ...

A team studying one of the largest photovoltaic parks in China, the Gonghe project in the Talatan Desert, found a striking difference between what was happening under the panels and what ...

The prefecture has established 32 photovoltaic eco-pastures and 56 centralized grazing sites within the solar park, supporting 18 surrounding villages that raise more than 20,000 sheep ...

In late May, greenness finally emerged in the yellow-gray expanse of the Talatan Gobi Desert in Gonghe County, part of the Hainan Tibetan Autonomous Prefecture in northwest China's ...

Solar panels stretch across the Gonghe Basin in Qinghai, where new research shows rising soil moisture and growing vegetation beneath the array. As plants and microbes respond, they ...

In China's northwest, vast solar parks do more than make electricity--they subtly rework air, soil and water near the ground. The science points to microclimates forming beneath panels, with ...
