Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek "Operator of Electricity Market" RES fund. To reduce that deficit...

Various financial support programs are available, including schemes for rooftop solar panels and solar PV installations with storage, funded by the Recovery and Resilience Fund.

Greece installed 400 MW of net-metered PV systems in 2024, bringing its cumulative distributed solar capacity to 850 MW. However, the country shifted from net metering to net billing in...
