We describe a new agreement between renewable energy developers and utilities, informed by the technical analysis.

This study could help stakeholders in the market understand the economic-technical aspects from analyzing economic-financial indicators of floating PV plants with a capacity of 47.5 MW ...

This guide, produced by the Interstate Renewable Energy Council, Inc. (IREC), introduces the issues surrounding policy and technical considerations of grid-integrated renewable energy.

This paper provides a thorough examination of all most aspects concerning photovoltaic power plant grid connection, from grid codes to inverter topologies and control. The reader is guided ...

Solar Contracts are fine-tuned for small and medium-sized, grid-connected solar PV projects. Standardised contracts include: Power Purchase Agreement, Implementation Agreement, O& M ...
